The Annual Report 2019

We established friendly relationships in our Committee. In March we have sent the last inputs to WABA Board regarding the Ethics Document that new Students, Practitioners and Instructors will be asked to sign.

This year we have two (2) requests from WABA Board to start a communication towards mediation.

1. One of them is the request from Watsu Instructor to develop a new Training Institute in Czech Republic.
2. The Board recommends us to be in charge with the complaint from Comitê de Ética - Instituto Latino Americano de Watsu re one of Watsu Instructor's in South America. There are concerns with the number of hours that are shown on the WABR site not calculating up to the required days and hours.

EEU decided:

1. Keli Procopio will be the mediator and will help to find the most favorable way to solve the current situation in Czech Republic. Our team contacted the stakeholders, they are willing to resolve any conflicts/complaints.

2. Jurgita Svediene will gather all information about the situation in South America from both stakeholders. They were invited to participate and help resolve any conflicts that are at the core of the complaint and find meaningful solutions going forward.

We are here to keep our Water community filled with Ethical behavior.

With respect,
Jurgita Svediene, the Chair of EUEC
